## Don't Forget the Wednesday Evening Net.

**From Will VA3WEW.**

Just a reminder that Our Club net is on 147.120 + at 7:30PM local time every Wednesday. Plan to be there.

+++++

## Don't Forget the Club Meetings.

3rd Tuesday (except July & August)

19:30 Local

Royal Canadian Legion, 471 Simcoe St, just north of Hwy 401

+++++

## From the chair in the shack.

2008 begins with an area of reverse magnetic polarity in a region of the sun far from its equator. Scientists tell us that this is a very promising sign of the arrival of a new high in solar activity. To all of us hams this means much easier DX on 6m, on 10m and on the traditional bands as well. Time to plan for a great time by 2010 or so.

In the meantime, DX is possible in spurts on almost any band for you to practice on. One of our keenest members could have told us that making contacts under just about any conditions is possible if you are patient and know what your rig and antenna can do. Howie, VE3TYQ, personified a ham who would not be kept off the air even when moved to a 6th floor apartment. He would not give up (sure he complained loudly) and the results he got were the fruits of lots of experimenting and learning and the patience to keep going. With bits and pieces, he put together a station that worked and did he ever work. If he wanted to check out different bands, it often meant changing the array of metal he was using but he almost always succeeded.

Somehow, being a ham calls all of us to follow his example. Keep at it and know what you want. Find out what is reasonable to expect and then get down to it. Experiment with all kinds of "junk", knowing that it won't be a beam but it will work to some place. The combination of experimenting, learning from others and written materials, building peculiar stuff to radiate and never giving up is what makes a successful ham.

Above all, remember that a store bought antenna can usually be beaten by a home-built in one or more areas. Learn from Cebik what works and when and you can top the manufacturer who makes something to everything and none of well. Specialize in your choices and do what you set out to do. One of the most powerful stations on 40m for the Transprovincial net is VA3SWO who built a "cage" dipole tuned for the net frequency. It only works the one band but gives out a huge signal.

May the new year see all of us following Howie's example. For all we know the noises on the hf bands may be him trying to get us once more. Be well. Enjoy.

73 de Pete

## Durham ARES Information.

### From Steve VA3SPH

ARES Jan. 2008-01-19  
ARES Feb. 2008-02-23  
ARES Mar. 2008-03-15  
ARES Apr. 2008-04-12  
ARES May 2008-05-10

ARES Jun 2008-06-21  
ARES Sep 2008-09-27  
ARES Oct 2008-10-18  
ARES Nov. 2008-11-22

Meetings are at 9:00AM  
Ajax Fire Hall #2  
435 Monarch Avenue  
Ajax, ON

If someone is interested in joining Durham ARES they can contact:

EC Bob Leek VA3TFD <rleek@rogers.com>  
AEC Gord Hewit VE3GIH <gordon.hewit@gmail.com>  
AEC Steve Hellyer VA3SPH <VA3SPH@mac.com>  
AEC Doug Boyd VA3BGF <va3bgf@yahoo.ca>

Participant need a valid Amateur BASIC license, Phone Number where they can be reached, and be able to put together an Portable Deployment Kit. The Deployment kit contents for each level are listed on the following pages.

+++++

As the New Year starts there are those who make resolutions and those who don't. Some resolutions are kept and some last a surprisingly short time. Whatever tradition you hold, remember that you can make it the best year yet. It's funny how sometimes we don't have the time to do it right, but we sure have a lot of time to do it over. Remember the Club activities and ARES. Nothing will do more to help or hinder an endeavour than our behaviour. My Opinion is that our Club is something that we all can be proud of. We have excellent examples of how to model our behaviour in Club Members past and present.

Your scribe,

Ken  
VE3RMK

# Deployment Kit Checklist

## Level A

Date: Nov. 20/06  
REV: 1.0

Personal Gear	✓	Radio Gear	✓
Bottle for water 1L		2m Transceiver w/5w+ var. tune	
Snack food		Portable external 2m antenna	
Personal Medications		- Portable Gnd Plane ( If Req.)	
Cup		Headphones/earpiece for radio
