Meetings are ALWAYS on the 2nd Monday of the month at 19:30 SHARP

At the Arts & resources Centre in Oshawa on Queen Street.

The Thu. OSH not at 19:30 hrs, CW practice at 20:30 hrs by Bernie VE3ATI.

North Shore Amateur
Radio Club Inc.
P.O. Box 171, Oshawa
Ontario L1H 7L1

Trivia For June

Who was one of the first amateur to pioneer weather satellite pictures? (Editor)

Field Day 1993

Well field day is about here for another year, with all the new amateur radio operators that the N.S.A.R.C. has now I expect there will be a line up to operate (except on the midnight shift hi hi) so I w suggest that you contact VE3BTR Tom Rogers at 416-640-5549 or on VE3OSH and get your name on a list of operators, for all the new ops, the breakfast that is served at the site is something to be talked about as well so be sure to attend field day and support your club . I am not sure if the NEW trailer that will house all the antennas and associated gear will be ready for field day or not, I heard something about painting a little while back so it may be ready to travel soon. (Editor)

CTCSS Operation On OSH

For all who may not know or for those of us who have forgotten VE3OSH has a sub audible tone on its out put, the purpose of this is to be able to eliminate intermodulation that many amateurs experience who live in heavily populated areas. If you have one of the newer transceivers that have this capability and are plagued by intermodulation from paging systems and the like, then the solution is simple. If you are like me you will have to resort to the owners manual for the procedure, once that is overcome then set the CTCSS frequency to 156.7 Hz and activate it. You will now only hear VE3OSH when its transmitter comes on, if any intermodulation comes on you will hear nothing, you will see the busy light on your RX come on but you will not be plagued by all the other garbage that is out there floating around. When the repeater comes on it will generate a tone of 156.7 Hz that will open the squelch circuit of your RX thus allowing you to hear the repeater signal and over riding any intermodulation that may be on

at that time. So if you have the option and have forgotten about it this is the chance to activate it and make use of the feature that is available on VE3OSH.

Local Patch In Oshawa

By The time you read this the patch on VE3OUR 443.375 ,owned and operated by VE3LIZ Glen, should be operational, anyone who wishes to have the phone patch privilege in the Oshawa area should contact Glen VE3LIZ or Len VE3SVD, I understand there will be a form at the next meeting for anyone interested and Len will be available to answer any questions. Glen IS NOT forming a new organisation just a local phone patch for the Oshawa area. (Editor)

Need Instructor!!!

As far as I know there is a position open for instructor the code and theory classes this fall. Anyone interested in this position can contact any member of the N.S.A.R.C. executive or VE3ASH Rick Gibson.

New Ham Calls

I know that there have been lots of new calls issued but have not received any calls to inform me of what they are, unfortunately I can not update the membership list nor will the mailing labels be updated unless the information is received by myself or VE3LHZ Paul Dale. (Editor)

Lem Says

Drive safely, summer is here again and we want to talk to you not about you. (VE3SVD)

Hint's

A bar of soap makes a great pin cushion and keeps pins and needles lubricated. (Editor)

Minutes Of General Meeting

Meeting was called to order at 19:45 with forty-two members in attendance.

Treasurer's report indicated a balance of \$13,707.00 of which \$1,700.00 is part of EMO funds.

Fleamarket Laird, VE3LKS reported that the fleamarket raised \$4,792.00 for the club.

EMO Margaret, VE3BNN report on meetings which she attended and reported that an exercise is planned for July. She also reported that hams participating in any EMO exercises will have workman's compensation board coverage in the event of an accident. Durham Social Services have requested that two mobile units be made available at the Durham College location. It is uncertain as to their function at that site. Margaret will look into whether automobile accident coverage will also be provided by the Durham Social Services department.

Library Display Margaret reported that the club will be able to put on a display at the Oshawa Public Library , Main Branch commencing June 1st, for a period of two weeks. Any suggestions that you may have for the display should be brought to her attention.

Trailer Jim VE3SVM reported on the progress of the trailer with drawings. He also displayed the reversible signs advertising Field Day and Jamboree On the Air

Packet Radio The SOPRA digipeater has been moved to Balantry, Aurora Side Road and Kennedy Road. Casey, VE3NGT mentioned that club members may wish to use the DURHAM , VE3USH node on 144.930 MHz.

Repeater Committee Eric, VE3HMG has organised a committee consisting of Glen, VE3LIZ and Len, VE3SVD to look after the repeater. They will be looking at obtaining new equipment to replace old equipment.

Nonquon Canoe Race and Triathlon Glen, VE3LIZ is still looking for volunteers to assist in this two day event.

Motion was made by Ralph, VE3CRK to have the club join the Radio Amateurs of Canada, (RAC) and provide them with a donation. Seconded by Norm, VE3ON. Motion carried. Discussion indicated that \$1.00 per member was not unreasonable. Suggestion was made to obtain a life membership as it would be almost the same cost. Subscription to CARF would be made available at club meetings or possible stored at the public library if they are receptive to the idea. Executive was to investigate and act on motion accordingly.

Coffee Break

50/50 Draw was won by Margaret, VE3BNN. Additional numbers were draw for boxed plants that were donated by Eric, VE3HMG.

Winston, VE3WFS introduced Vernon Vowles of Bell Canada who gave an excellent talk on telephone interference. (VE3TIG)

Peter Says

Speak not at 8-cylinder speed with 1-cylinder thoughts

and

A married couple that plays cards together is just a fight that hasn't started yet. (VE3PLM)

WHO SAW WHAT SAW

When I was down in Arkansas, I saw a saw saw, that could out saw any saw I ever saw saw. If you ever saw a saw saw that could out saw the saw I saw saw when I was down in Arkansas, I'd like to see the saw saw that could out saw the saw that I saw saw when I was down in Arkansas. Saw on that for a while. (Editor)

Home Hints

To eliminate cigarette smoke in a room, soak a towel in water, wring it out completely then swish it around the room and when tightening and loosening screws always remember, "left is loose. right is tight". (Editor)

Taken from a 1972 membership list of the N.S.A.R.C. for all or any who may be interested

More New Hams

Well it looks as if there going to be a lot of new hams out there this summer having a great time. I received a couple of phone calls this last week letting me know that they had received their calls, and they are **Winfried K. Ambruch VE3VHX** and **Howard Mugford VE3TYQ**. I know that there are more who have received their calls but unfortunately I have not heard from YOU.

Do You Have The Club Logo On That Shirt For Field Day Yet?

For anyone who is interested in having the club logo on their favourite sweater, jacket, T shirt or any thing else you can think of may have the job done at **PEACOCK SPORTS** in Whitby, 110 Athol St. 416-666-1114. The club has purchased a computer tape to have the club logo put on clothing items, so all you have to do is drop into the store, show your membership card and decide what you want to have the club logo put on and they will accommodate you so make sure you have the logo and your call put on that new T-shirt before Field day. (Editor)

It's Still The Law

It's against the law to gargle in public in Louisiana..It's illegal to hunt or shoot camels in Arizona..It's illegal to dance cheek-to-cheek in Compton, California. (VE3PLM)

Household Hint

After sanding any surface, put an old nylon stocking over your hand to locate the slightest roughness and to eliminate odours keep an open box of baking soda, or a small bowl of charcoal (from the plant store) or a piece of cotton dipped in vanilla extract in your refrigerator. (Editor)

Sermon On The Mount Next Month

For all the new hams that have not been to the **July** meeting commonly known as **Sermon On The Mount** you are in for a great evening of socialising and just having a great time. I am not sure what is on the agenda for this year but usually there is an abundant supply of hot dogs, doughnuts, soft drinks and coffee for all who wish. So if you are a new ham and have not been there before then be sure an attend and if you are a seasoned ham but have not been able to attend for one reason or another then make an effort to attend, I am sure you will not regret it. More to follow next month.

(Editor)

Field Day 1993

Well it's that time of year again, field day, this is a very good time for all the new hams to see what the event is all about and get some operating in and see what **HAM RADIO** is really all about, and see what they are missing when it comes to HF operation, the distance that can be covered is phenomenal compared to what can be worked on VHF, that alone is a very big reason to continue and upgrade the licence, so come out and see what goes on, do some operating or just look around and observe if you like, you may find yourself operating after all.
