PRESIDENT'S REMARKS

June, 1971

I will assume that this month's bulletin will be printed on our newly acquired Gestetner. It was advertised in the local paper and Lorna, VE3GNO and I looked it over. Lorna's office experience enabled her to evaluate the machine and the price was within the means of the club so it was duly purchased along with a supply of paper, stencils and ink. Not having a duplicator has been a hang up for many years with the club. Now anybody can be an editor.

Don't forget the "Worked All States Contest" now in effect. Bring your totals to the next meeting so Walter VE3FJC can list them on his charts. Would you believe I have four.

Next meeting we will have to finalize Field Day or shelve it. If you feel like having a fun week-end in June be prepared to make your intentions known to Ralph, VE3CRK.

Ken, VE3FPP

P.S. Mike, VE3DKW and two other hams are planning a moon bounce on 2800 Mhz in the near future.

June, 1971

IT'S FIELD DAY TIME AGAIN

Comments from other clubs about past Field Days.....

"Good fast CW operators are hard to come by, but phone yappers are in abundance in any club."

"The rain let up just long enough for us to get our antennas up."

"The neighbors gave us no trouble at all. We operated next to a cemetery."

"As we closed down everyone was saying that this was absolutely the last Field Day ever!" (We also said that last year, the year before, etc.)

"Experience teaches that he who transmits with broken coax for 18 hours shall not succeed."

"Ever try to buy a gallon of gas at 3 a.m.?"

"After being completely set up, Murphy struck! A table collapsed with LWC and his rig falling to the floor. What a let down!"

The Field Day site this year is the same as last year's - at Bill Cox's farm north of Bowmanville. Bill has been a mighty fine fellow in letting us use his apple orchard for the last couple of years, and we do appreciate it.

The 1971 Field Day rules are published in May issue of QST, page 68, and I strongly suggest that you read them before coming out to the site as they have been changed this year

The dates to keep clear are June 26-27. Start time is 1800 GMT (Sat.) and lasts until 1800 GMT (Sun.) - 24 consecutive hours.

The following are the number of stations we hope to have in operation: 80--40 phone, 80-15 CW, 40 CW, 20-10 phone CW.

We are looking forward to a good Field Day with lots of fun and hard work and an even bigger score than last year. Especially, if some of the great ideas work that some fellows are going to try. So come out this year and have some fun and support your Club.

Ralph Day, VE3CRK
Field Day Manager.
