Last month a picnic was proposed for August 8th. The date has been changed to August 15th. The place - Egan Creek Retreats - properties of Bernie, VE3ATI, Pete & Lorna VE3DFD & VE3GNO and Ken & Doreen, VE3FPP & VE3FUR.

Bring your own food. Good water available for drinking. One 110V power plug of 20A rating and supposedly good fishing. Good canoeing and many trails.

To get to the site go south from Bancroft on #62. You will note Quarry Lake, L'amble Lake and finally Tait lake. At L'amble, Gulf station on west side turn towards Detlor. Detlor will be a group of houses where the road dips and crosses a railroad track. Proceed about 2 miles further and note a white church on right side. Turn south on gravel road for about 1 mile. Total distance from Bancroft - 10 miles

Last month's star nite at the repeater site was fairly well attended considering the wx report. We saw four of the twelve moons of Jupiter, the RPT tower, lights of Oshawa and Farney had his scope trained on some blond up in Port Perry. Ken FPP, Farney, BHQ and Jack GEK brought the equipment along. Some of the members who had not seen the repeater before had a good look this time and Harry, QG did some checks with Motorola test gear brought along by Bill Berrill. That fierce storm following field day knocked out the line transformer by the Skeet clubhouse also a small fan used to cool the final. Fortunately, the fan was able to be repaired and it was back in service in a few days.

John, FGL is now in the North GM plant in the Lab.

Ken, FPP plans to construct a Theremin which is a musical instrument that sounds like a cat on the backyard fence. It uses several oscillators and is played by moving the hand up and down over it. Ken's transistor in the new ignition system silently gave up and he had to put it back on the regular system somewhere near Bancrfft. Back to the drawing board!

FOR SALE:

Heath HR-10B Rx	\$80.00
" DX-40 Tx	35.00
" HG-10B VFO	35.00
RME Pre-selector	8.00

Phone Ray Plante, VE3DEN 576-1449 for further details.
